## EDUCATION

**California State University Monterey Bay** Dec 2020  
Marina, CA  
Bachelor of Science in Computer Science

## RELEVANT EXPERIENCE

**Web Developer** Sept 2025 – Dec 2025  
Liminal Webs, Corona, CA

- Designed the company's [website](#) to have good user experience (UX) and optimized it for mobile and desktop use.
- Implemented security headers to prevent security vulnerabilities like Cross-Site Scripting, Clickjacking, and more.
- Developed a MVP for an audio tagging and trimming desktop application using Python.
- Maintained scores of 100 for best practices, SEO, and accessibility on Google's PageSpeed Insights.
- Built websites with HTML, CSS, JavaScript, and using CMS platforms like Wix and Shopify; hosted on GitHub, Firebase, and configured to Cloudflare.

**Web Software Engineer** June 2024 – Dec 2024  
County of Monterey, Salinas, CA

- Managed and optimized web content across 11 departments using Granicus govAccess CMS.
- Led accessibility training sessions on PDF remediation for staff from a number of different departments.
- Enhanced accessibility, quality assurance, and SEO scores, achieving an approximate 27% overall improvement.
- Updated department web pages with accessibility-compliant navigation bars, accordion widgets optimized for SEO, and converted PDFs into accessible data tables using HTML and CSS.
- Streamlined document archiving processes and updated web pages to ensure compliance with county standards.

**Automotive Engineer** April 2024 – June 2024  
Revature, Remote

- Conducted research on electronics, network topologies (CAN BUS), and emerging technologies.
- Developed and presented case studies, including safety analyses like the Ford Pinto incident.
- Collaborated with multiple teams and created detailed wiring diagrams for automotive systems.
- Worked with breadboards to demonstrate basic electrical circuits, including lighting an LED using resistors.

**Web Developer** Jan 2024 – April 2024  
Cosecha Church, Riverside, CA

- Volunteered to modernize [Cosecha Church's website](#), focusing on creating a streamlined, engaging online presence.
- Coordinated with a faith leader to implement desired deliverables for the project.
- Managed the development with security in mind, and organized a clean and maintainable code base.

**E-Commerce Web Developer** Oct 2023 – Jan 2024  
Transient Ink, Sacramento, CA

- Managed [Transient Ink](#), an e-commerce store, as a shopify developer, utilizing the Shopify platform.
- Designed and crafted the website's aesthetic and user interface, focusing on an appealing shopping experience.
- Handled all aspects of the online business, including product photography, product selection, inventory, etc.

**Teacher's Assistant** Feb 2018 – Dec 2019  
Digital NEST, Salinas, CA

- Fostered a positive learning environment, teaching students Unity/C# and guiding fellow teaching students.
- Led the development of a VR game using Unity and Oculus/Meta in partnership with students and a client.
